VARNISHING

PAINT SPRAY GUN SATAJET 1000 B RP

The all-rounder of flow cup paint spray guns. The SATAjet 1000 B fulfils even the most demanding of requirements in terms of painting and varnishing results. It has a broad spectrum of nozzles and a diverse range of accessories, allowing a wide range of different coating materials to be used with outstanding results.

- ✓ Optimised high pressure technology and only minimal overspray with maximum operating speed
- ✓ Fast and easy changing of the air nozzle, with only 1.5 turns of the QC thread
- ✓ Simplified cleaning due to the smooth surface of the gun body

PAINT SPRAY GUN SAMES FPRO G

Guarantees a high-quality premium finish. The FPro paint spray gun is well-suited to coating materials with a low level of viscosity and also reduces wastage of paint or varnish. It is very easy to handle and is therefore popular with painters and decorators from all sectors. The flow cup, which holds a volume of 0.6 l, is designed with frequent colour changes in mind and is easy to clean.

- ✓ High quality atomisation
- ✓ Modular spray gun for a multitude of uses
- ✓ Ergonomic and robust design

Material viscosity DIN 4	Cup	Nozzle ID in mm	Width of spray jet

VKWG: 9556 | VKWK: 971

PAINT SPRAY GUNS

PAINT SPRAY GUN SAMES FPRO G GSP

Guarantees a high-quality premium finish. With the FPro G GSP paint spray gun, additional pressure is applied to the flow cup to make it easier to create a fine spray with materials that have an especially high degree of viscosity. The paint spray gun is suitable for use in all industrial applications. The pressure-assisted flow cup has a capacity of 0.6 l.

- ✓ Pressure regulator allows pressure to be applied with precision, depending on the viscosity of the paint or varnish
- ✓ Modular spray gun for a multitude of uses
- ✓ Ergonomic and robust design

Material viscosity DIN 4	Cup	Nozzle ID in mm	Width of spray jet

RPS CUP SYSTEM SATA I ADAPTER

For perfect coating results and excellent commercial viability. The single-use cup system offers four functions: mixing the paint or varnish, applying it, refilling it and storing it. To use the cup system on paint spray guns, various adapters need to be used.

- ✓ Complete system comprises a cup, a lid and a 200 µm strainer
- ✓ Faster preparation of the paint/varnish
- ✓ Reduced use of cleaning agents

PAINT SPRAYING EQUIPMENT

MINI MERKUR ES GRACO

The reliable and highly professional paint sprayer with a compact design. The Mini Merkur ES is air-assisted and especially suitable for use with very small quantities of water-based or solvent-based paints and varnishes and with frequent colour changes. The sprayer is extremely easy to handle and can therefore be put to various uses in the workshop. You will need a compressor to operate the Mini Merkur. Delivery includes: Mini Merkur 30:1, double hose 7.5 metres (air hose and coating material hose), spray gun Perform AA, nozzle AAF 412 in a nozzle holder, suction and return system, pump oil, 118 ml.

- ✓ The whole system can be filled with a very small quantity of coating material
- ✓ Produces a first-class, even finish
- ✓ Quick rinsing system – can be rinsed in just a few minutes

Description	Article no.	SU

VKWG: 9556 | VKWK: 971

MAXI MERKUR GRACO

The high-performance paint sprayer with a long lifespan. Maxi Merkur is air-assisted. The air pressure regulators can be easily reached by the user, making it very simple to adjust and monitor the air pressure. The focus here is on continuous operation and on the application of larger quantities of water-based or solvent-based coatings. This paint sprayer is suitable for universal use on account of its size and weight. Delivery includes: Maxi Merkur 30:1, double hose 7.5 metres (air hose and coating material hose) incl. protective hose, spray gun Perform AA, nozzle 413 in a nozzle holder, gun filter and pump oil, 236 ml.

- ✓ Stainless steel pump construction with a long lifespan
- ✓ Minimal consumption of air ensures improved efficiency
- ✓ Produces a first-class, even finish

AIRCOMBI PAINT SPRAYER MARX

Compact and high-performance paint sprayer. The paint sprayer is made entirely out of stainless steel, making it very robust and giving it a long lifespan. The black anodised paint spray gun is comfortable to hold and allows the user to create surfaces of an outstanding quality. The optimised air flow allows a very finely atomised spray to be achieved with very little paint mist. The filter can be changed without the use of tools. Areas of application: for all water-based and solvent-based clear varnishes and coloured paints. Delivery includes: stainless steel piston pump 33:1, 7.5 m soft hose set, black anodised paint spray gun, atomiser unit with nozzle, 0.33 mm hole and 50° spray angle, with filter that can be removed by hand and swivel joint, release agent, earthing cable and instruction manual.

EQUIPMENT FOR PAINTING BOOTHS

SURFACE FILTER

The filter is made of a high performance non-woven fabric and is constructed so that it achieves optimum filter performance and dust storage capacity at a low pressure differential. The mat is actively adhesive and provides security against the ingress of dust. The fibre layer density increases on the clean air side and thus improves the storage of paint and dust particles.

- ✓ Moisture and temperature resistant
- ✓ Protects against paint deposits

SURFACE FILTER WATER VARNISH

High-quality filter especially for the filtration of water-based varnish particles in spray booths. The surface filter guarantees a high separation level with a low pressure loss at the same time. This is made possible by its extremely fine, very elastic glass fibres.

- ✓ High storage capacity and long pot life
- ✓ for motors and exhaust ducts
- ✓ Saving of energy costs due to high inherent stability

COAGULATION SET MARX

Set for the treatment of dirty paint water resulting from the cleaning of paint recovery systems, application equipment or flooding systems for the professional disposal in the sewage system. By adding flocculant and stirring with the coagulation stick, the paint water settles and can be filtered.

- ✓ easy to use
- ✓ low investment costs – highly efficient
- ✓ space-saving

- Lieferumfang:
- 2 x 30 litre plastic containers
 - 1 perforated metal top section with supporting triangle
 - 10x coarse filters
 - 1x fine filter
 - 25 kg flocculant
 - 1 pneumatic coagulation stick

SANDING & POLISHING

DEROS-ECCENTRIC 650CV ELECTRIC MIRKA

The Mirka DEROS eccentric is low-maintenance, reliable and durable. Perfect for lacquer grinding work. Thanks to the symmetrical design, you can work just as comfortably with the left as with the right hand. The very low vibration and volume values make the work easier and protect the health of the user.

- ✓ **Vibration sensor and Bluetooth connectivity***
- ✓ **Extraction with industrial vacuum cleaners**
- ✓ **No transformer required**

PAINT ROLLERS

CONCAVE SUPERFLOCK VARNISHING ROLLER

This universal varnish roller (Ø 35 mm) is suitable for rolling water-based varnishes and low-solvent synthetic resin varnishes on fine surfaces. It leaves no rolling marks and has hair-thin fibres that absorb the colour very well.

- ✓ Application without rolling marks or paint edges
- ✓ Good colour absorption due to separate fine fibres

Size	Article no.	SU
100 mm	958500030017	10 pieces

VKWK: 9543 | VKWK: 971

PROFESSIONAL FOAM VARNISHING ROLLER

This varnishing roller consists of an extra fine foam and is therefore suitable for the application of synthetic resin varnishes and is conditionally solvent-resistant.

- ✓ No bubbles when varnishing
- ✓ Made of extra fine foam

Size	Article no.	SU
100 mm	958400030017	10 piece

VKWK: 9543 | VKWK: 971

SHORT HAIR ROLLER

High-quality paint roller made of microfibre yarns and a polyester blend with a shearing height of 5 mm. The short hair roller is suitable for the application of acrylic and alkyd resin lacquers, PU varnishes and oils.

- ✓ No streaking and rolling marks
- ✓ Good colour flow

Size	Article no.	SU
100 mm	950900030017	10 piece
250 mm	950900030117	

VKWK: 9541 | VKWK: 971

EXQUISITE-PAINT ROLLER ULTIMO

Non-padded paint roller (Ø 102 mm) for the application of wall and facade paints. It is suitable for application on smooth or slightly structured substrates and achieves a uniform result.

Size	Article no.	SU
250 mm	958900030011	1 piece

VKWK: 9541 | VKWK: 971

PLUG-IN BRACKET FOR VARNISH ROLLER

This bracket should be used in conjunction with the varnishing and painting rollers. It is made of metal with a plastic handle.

- ✓ Handle fits well in the hand
- ✓ Rustproof metal

Size	Article no.	SU
100 mm	951200030011	1 piece
250 mm	951200030111

REPAIR

GRILITH HARD WAX STICKS

A high-quality wax product for repairing all damages in the surface and edge area that is subject to greater stress. Grilith hard wax sticks are also suitable for repairing doors and windows. The hard wax is dissolved with a hard wax melter, it hardens very quickly, does not shrink and is highly light-resistant.

- ✓ For repair work on surfaces subject to particular stress
- ✓ Also suitable for edge areas

Paint runs through our veins.

Over 90 years ago, Johann Berghofer laid the foundation stone for ADLER and work was started to develop its own paints.

Much has changed since that time, but one thing has stayed the same: our passion for colour, which drives us day after day to work on the perfect surface coating.

Paint runs through our veins.
